

MEMORANDUM

European Directive 2015/863/EU on the Restriction of Hazardous Substances (RoHS2)

American Elite Molding, LLC certifies that all cable ties and wire positioning devices we manufacture meet the relevant requirements of EU Directives RoHS2 Directive 2011/65/EU (replacing directive 2002/95/EC) and including all amendments through 2015/863/EU.

RoHS regulations limit and/or require disclosure concerning the use of certain hazardous materials in various types of automotive, electronic, electrical, medical, packaging and consumer products. These restricted materials include mercury, lead, cadmium hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE).

To the best of our knowledge, these materials are not generated during the manufacturing process are not intentionally added to American Elite Molding cable ties. Therefore, based on the information available to us from our raw material suppliers, products offered in our product line, does not contain any referenced material in the subject EU directives.

Best Regards,
Randal Denney
